

Deep Freezer WiFi IoT Device

RT-DFI-GO

Smart Monitoring for Cold Chain Excellence

Our Deep Freezer IoT device is designed to automate freezer management with real-time tracking of internal environmental parameters. Ensure your critical assets are stored under optimal conditions with precise monitoring, smart connectivity, and instant alerts. Ideal for pharma, healthcare, F&B, and logistics.

Key Features

Wide-Range Temperature & Humidity Monitoring

Reliable Global Connectivity

Smart Data Transmission

Compact & Durable Design

5V Efficient Power Input

WiFi World Wide GSM/GPRS and Location Tracking

Applications

- Pharmaceutical Cold Storage ☐
- Vaccine & Medical Supply Chain ☐
- Food & Beverage Freezers ☐
- Laboratory & Research Facilities ☐
- Cold Room Logistics ☐
