

IoT Controller Three Channel

RT-RC03-W

Smarter Control for Multiple Appliances

The RT-RC03-W is a compact and efficient three-channel IoT device built to modernize your home or office automation. Designed for controlling lights, fans, or ACs via a mobile app, it supports loads up to 5A per channel, with seamless Wi-Fi connectivity and fail-safe functionality. Perfect for simplifying electrical control while saving time, cost, and wiring complexity.
