

THAPS Environment Sensor

RT-THAPS-W

Advanced IoT-Based Environmental Monitoring System

THAPS is an advanced IoT-based device designed to monitor multiple environmental parameters and transmit real-time data to the cloud via Wi-Fi using HTTP or MQTT protocols.

Key Features

- Temperature Sensor
- Humidity Sensor
- Air Quality Sensor
- Barometric Pressure Sensor
- Sound Sensor
- Connectivity
- Display & Interface
- Temperature Sensor
- Power Supply
- Housing & Dimensions
- Cloud Integration

Applications

- Smart Buildings & Offices
- Research Labs & Clean Rooms
- Server & Data Centers
- Educational Institutions
- Hospitals & Clinics
- Home Automation Systems
