

Water Quality Sensor with Flowmeter

FIoT

RT-WQF-W

Smart Water Monitoring for Smarter Systems

The RT-WQF-W is a complete IoT-enabled solution designed for accurate monitoring of water quality and flow in real-time. Equipped with pH, ORP, and Flow Sensors, this system ensures precise control of water parameters while offering remote data access via cloud connectivity and a mobile app. Perfect for water treatment, industrial systems, and quality assurance.

Key Features

- ▶ Accurate pH & ORP Monitoring
- ▶ Integrated Flowmeter Support
- ▶ Real-Time Data Transmission
- ▶ OLED Display for Instant Readings
- ▶ Easy Onboard Calibration
- ▶ Simple Power & Installation

Applications

- Water Quality Monitoring Systems <<
- Water Treatment Plants <<
- Industrial Water Management <<
- Agriculture & Irrigation Monitoring <<
- Aquaculture & Fish Farming <<
- Residential or Commercial Water Usage Tracking <<
