

Real-Time 3-Zone IoT Input

RT-Z03-W

Compact three-zone input IoT alert device designed for instant alert triggers or feedback signals. It delivers real-time notifications to ensure quick response and operational efficiency. Seamlessly integrates with existing systems via API for enhanced monitoring and control.

Key Features

Three Dedicated Input Switches

Wi-Fi (802.11 b/g/n) – Up to 150 Mb/s

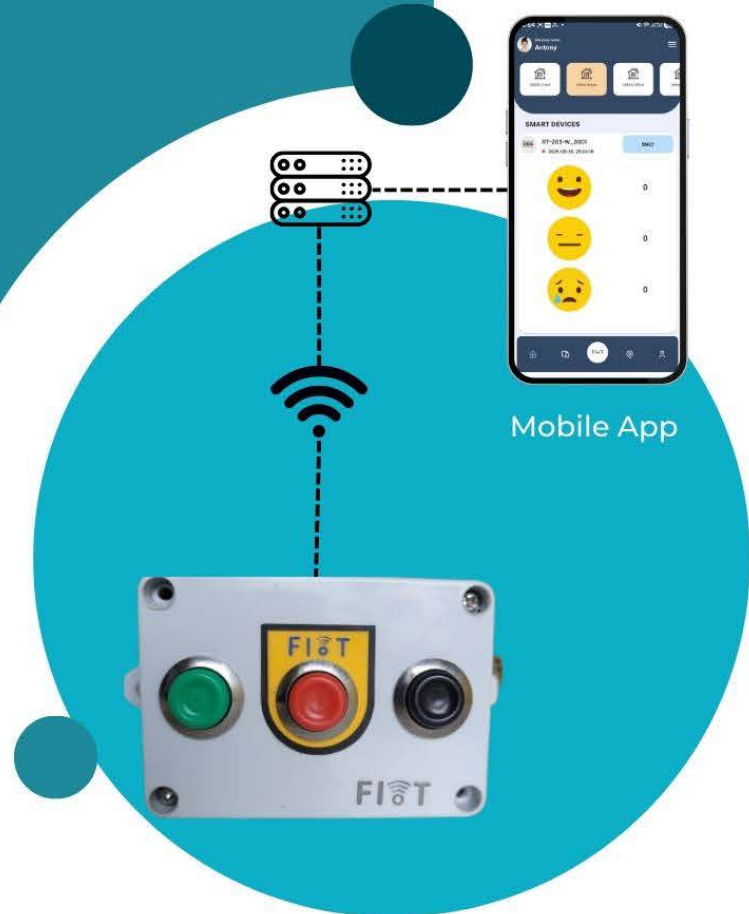

Onboard Configuration Switch

MQTT Protocol Support

API Output for Integration

Compact Indoor Housing (80 x 80 x 35 mm)

5V DC, 1.5A (USB-C)

Applications

Quality Control (QC) Switches ☒

Factory Line Monitoring ☐

Retail & Service Counters ☒

Alert Triggering System ☐
