

Industrial Edge IoT

FIoT

RT-IEI-E-GO

Seamless Connectivity for Smarter Industries

RT-IEI-E-GO Industrial Edge IoT Gateway – A compact, durable, and high-performance device that connects industrial systems to the cloud for real-time monitoring, control, and analytics. Built for efficiency, reliability, and seamless integration.

Key Features

Multiple I/O Support

Versatile Communication

Seamless Wi-Fi Connectivity

Cloud Connectivity

Robust Design

Real-Time Monitoring & Control

Cloud & Protocol Support

Applications

Industrial automation & process control ☐

Remote equipment monitoring ☐

Smart energy management ☐

Predictive maintenance solutions ☐

IoT-based data collection and analytics ☐
